Evolution of birds

The theory of Evolution has long been the one to propose various possibilities of creation of new species.

The primitive reptiles and organisms maybe the ones to be degenerated as fossils , which might lead to some kind of evolution.

The traits and characteristics of the primitive species maybe inherited in different ways and can lead to creation of new species like birds.

Different varieties of soil

Alluvial

Black

Laterite

The soil is a living system . It takes millions of years to form soil up to a few cm in depth. Various forces of nature such as change in temperature , actions of running water, wind , glaciers, activities of decomposers lead to formation of soil.

Alluvial – deposited by Himalayan rivers , They are fertile , with adequate proportion of potash, phosphoric acid and lime.

It is ideal for sugarcane, paddy, wheat, pulse, cereal crops.

Black soil – ideal for cotton .

Deccan trap(basalt) region spread over Deccan plateau , made up of lava flows. It is clayey material.

Laterite soil – Humus content is low because of micro- organisms particularly decomposers like bacteria.

Suitable for crops like cashew nuts.

Food Recipes

Rajma Chawal

Ingredients

250 gm Rice

200 gm Rajma

100 gm chopped onions

100 gm grated tomatoes

Salt to taste

Spices to taste

Boil rice in a cooker or fry pan with fresh water. Allow to cool and dry at room temperature.

Take some oil in kadhai, add salt and spices to taste. Heat it for some time . Add chopped onions and chopped tomatoes. Let it fry .

Then put the Rajma mixture into it. Add more water , if needed.

Let it heat for some time till cooked.

Mix boiled rice with this Rajma curry.

And serve.

Lifestyle

The lifestyle industry is booming with various varieties of clothes, ornaments.

The clothes could be of different species.

Indian attires basically includes sarees, suits , lehngas. The fabrics used basically are cotton, silk, propylene.

The printed, embroidered designs and patterns are available in India.

These can be matched with ornaments, of different designs to suit the occasion.

The different varieties of cotton and silk are also the deciding factor for quality.

Various colours can be used for designing of clothes , the basic yarn could be of different colours and the print and embroidery

threads could be contrast colours to suit the occasion.

Embroidery could include mirror, thread, metal works. Different designs can be used for sarees, suits, lehngas.

Bridal dresses could be made-to-order as per the bride's choice and jewellery she adorns.

The choices and pattern changes according to the customs and rituals of the family.

The prints could be made as black prints, paints, interwoven prints. The colours of paints used should be carefully selected as per the hygiene and quality.

Outsourcing

Outsourcing is a strategy used by the companies usually international to buy a service or process , it involves the act of moving some of the firm's internal activities and decision responsibility to external service providers . eg If a B school assigns house- keeping of school to an external contractor, it is outsourcing the work of house-keeping , complete responsibility for this, including equipment for scrubbing, mowing, washing, dusting- is taken over by the service provider.

This allows the firm to focus on its core business.

If a firm decides to outsource its customer service to any external firm, there is a

fear of losing jobs, sensitive information is lost to the agency which leads to loss of trade secrets , or in banking sector sensitive customer data will be lost

Glaucoma

Glaucoma is raised intra-ocular pressure due to increase in volume of aqueous humor in the anterior chamber of eye. This could be directly related to obstruction of the drainage of fluid at the Canal of Schlemm p. Sometimes fluid may pass through which it exists the eye via uveo-scleral junction.

It could be primary or secondary.

Primary can be simple or closed angle glaucoma.

Secondary may be due to any disease or anomaly of eye.
